How to Whitelist Overalls Email Domain

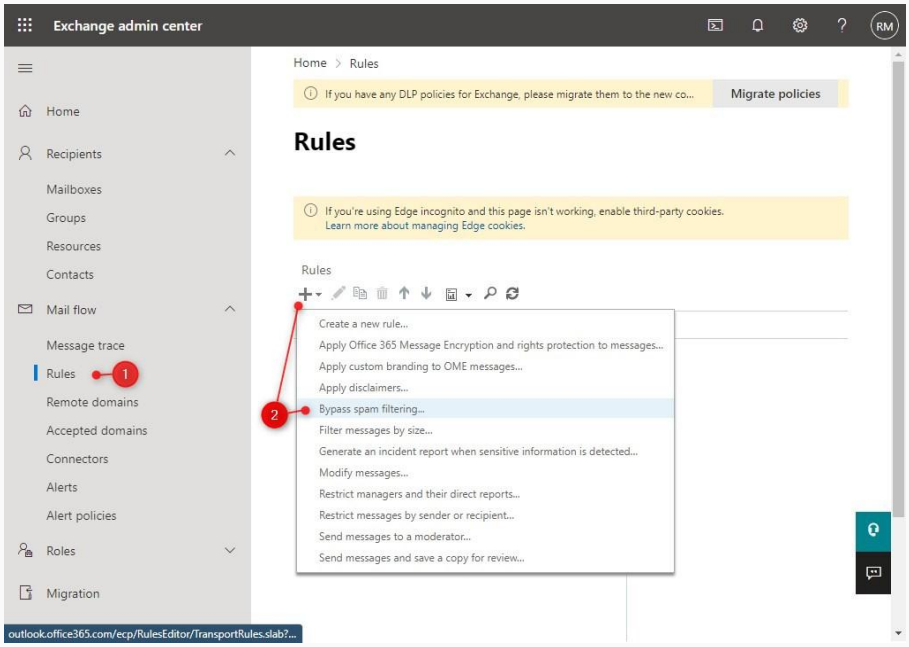

Whitelisting an email involves telling your email provider that you want emails from that sender to be allowed into your inbox rather than being filtered into spam.

Below are instructions on how to add Overalls to your email to make sure all of your employees are able to receive our emails for sign up!

Please whitelist the domain “@getoveralls.com” and “@e.getoveralls.com”

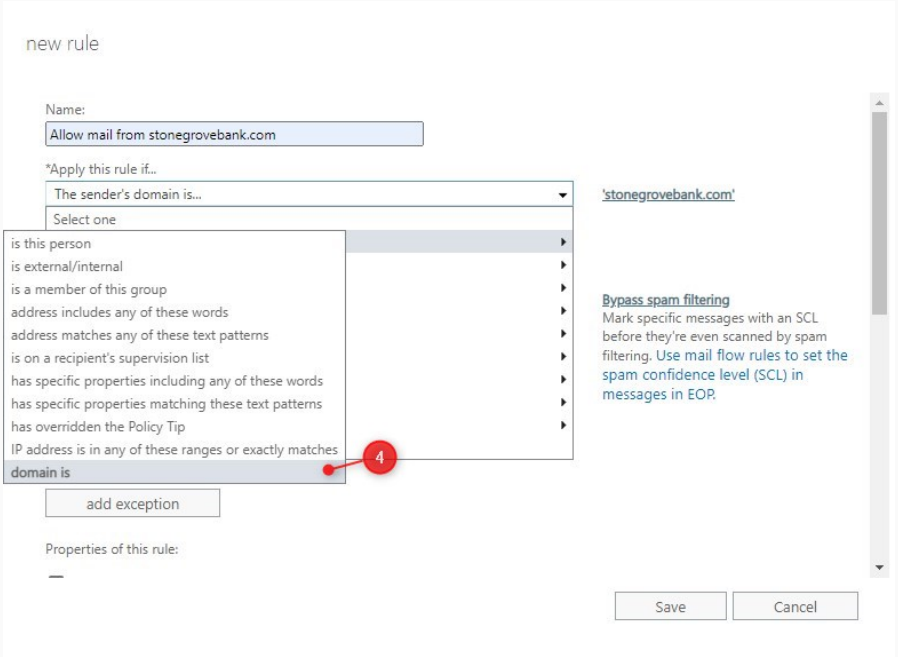

How to Whitelist an Email in Outlook

- Expand Mail flow and click on Rules
- Click on the plus icon and select Bypass Spam Filtering

Create a new mail flow rule

- Enter a name for the rule
- Under Apply this rule if, select Domain is
- Enter the ‘getoveralls.com’ & ‘e.getoveralls.com’

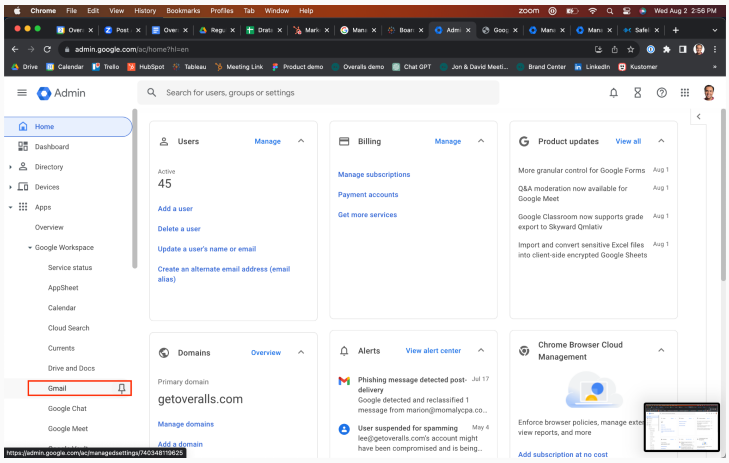

How to Whitelist an Email in Gmail

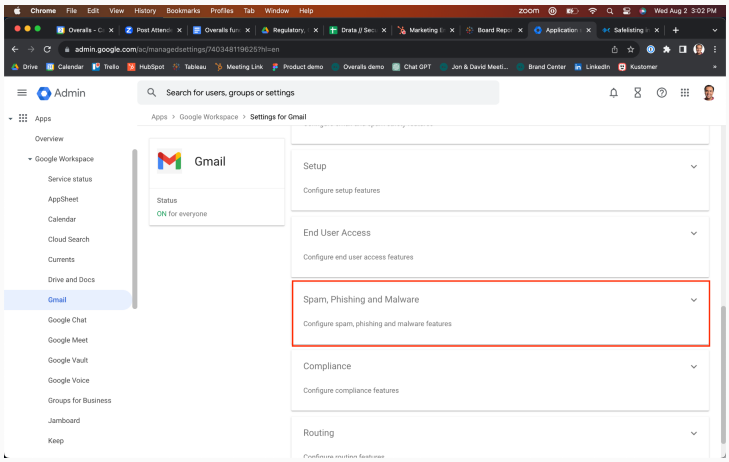

- In the Admin console Go to Apps > G Suite Gmail > Advanced settings.
- Scroll to the Spam section, hover over the setting, and click Configure.
- Enter a unique name for the setting
- Check the Bypass spam filters for messages received from addresses or domains within these approved senders lists box.
- Click Use existing or create a new one, enter a new list name, and click Create.
- Hover over the list name, click Edit, and then click Add.
- Enter domain name ‘getoveralls.com’ & ‘e.getoveralls.com’
- Save

Google Workplace Admin IP Address Whitelisting

1. Admin must log in to Google Workplace (admin.google.com)
2. Open the **Apps menu** on the left of the screen
3. Select "**Gmail**" from the menu on the left

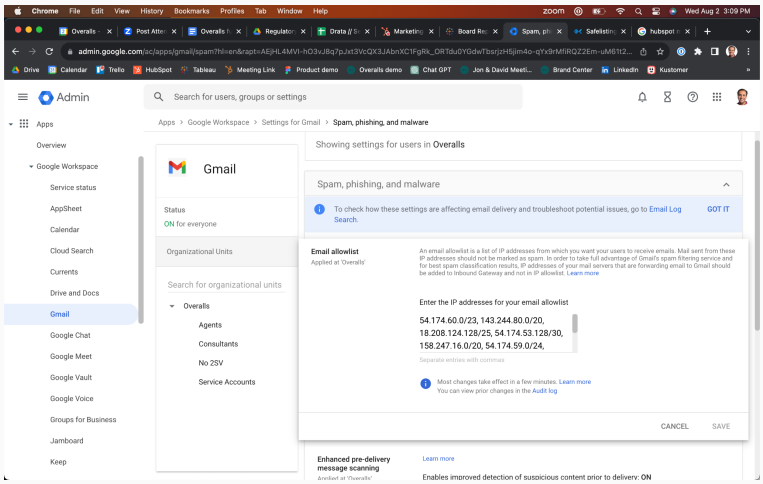

4. Scroll down and select"**Spam, Phishing, and Malware**"

5. Enter the following IP Addresses in the Email Allowlist field. Each IP Address should be separated by commas, as they are below

    54.174.60.0/23, 143.244.80.0/20, 18.208.124.128/25, 54.174.53.128/30, 158.247.16.0/20, 54.174.59.0/24, 54.174.63.0/24, 3.93.157.0/24, 54.174.52.0/24, 139.180.17.0/24, 54.174.57.0/24

6. Click “**Save**”, and you should be all set
